

# Muros Proposal 2018

I'm currently a notary node operator in Asia, I'm the only one in China behind the Big Firewall.  
(: I like break walls :)

My node was operating 99% of last year, showing I am very dedicated to the service of the platform.

I think it is necessary to have one of the 16 nodes of Asia in one of the most populated countries in the world, due to the recent government ban of centralised exchanges.

I am also going to present to the other regions and offer the same high level commitment that I have always given.
