

The Galt Mines

Proof Of Competence

Juan S. Galt

Crypto Educator & Strategist

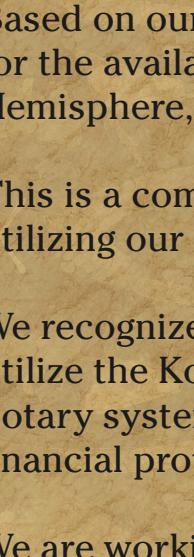

Juan has five years of Experience in the cryptocurrency space with over 300 articles and videos. He is a Strategist, Consultant, Public Speaker and a Komodo Ambassador since 2017. He is a regular guest on The Crypto Show and The BitcoinMeister Cryptocurrency Show.

He is an early adopter of Komodo and Supernet and was responsible for writing portions of the old Supernet Wiki.

He has also written in-depth articles describing the founding infrastructure of what we now know as Barterdex.

Juan's native language is Spanish and is considering entering the Latin American cryptocurrency education market.

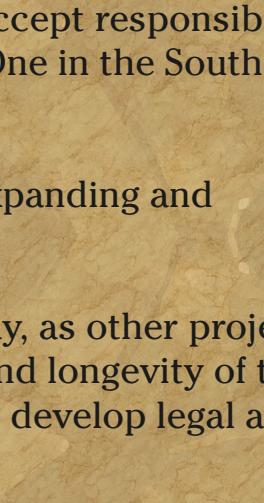

Ryan Herbison
Server Administration

Ryan has a twenty-five year background in networking, communications, and internet infrastructure having managed various Internet Service Providers in Canada. Experienced in Linux server administration and network security.

He has managed our NA Node for the past year, and we have managed to stay in the top 10 of Notary Nodes. Ryan will continue to operate our notary servers on a full-time basis.

He has lent his technical expertise to help at the last four Anarchapulco conferences in Acapulco, Mexico.

Travis Boyd
Business Infrastructure

Travis is a technological generalist with 20 years of experience constructing and operating IT infrastructure, including off-grid power systems and tower construction.

For the last decade, he has owned & operated an independent ISP in the rural US covering around 1000 square km.

He built our North America hosting facility and will be constructing our 2nd Galt Mines facility in Southern Chile at Fort Galt, where he also serves as the IT advisor and subcontractor.

Why You Want To Vote For Us

We are very excited about the prospects of a safe, easy to use, decentralized exchange system, which is a much-needed solution to centralized exchanges. Operating a notary node is an increasingly important role in this expanding crypto ecosystem.

After managing a North American Notary Node throughout 2017, we have grown our knowledge of the Komodo platform and demonstrated our competence by being in the top ten of notarizations.

Based on our experience, the Galt Mines team is now looking to accept responsibility for the availability and maintenance of three new Notary Nodes. One in the Southern Hemisphere, one in Europe and one in Asia.

This is a commitment that the three of us are happy to take on, expanding and utilizing our experience and talents to strengthen the platform.

We recognize the growing importance of the role that Notaries play, as other projects utilize the Komodo Platform. To further encourage the stability and longevity of the notary system we will be forming a business group to discuss and develop legal and financial protection strategies.

We are working to structure a legal entity to handle the unique nature of this decentralized 21st-century business and are eager to share ideas and collaborate.

Further details and invitations will be shared in the coming weeks.

We will also hold 15% of our revenue from each new Notary Node and use it to fund services and projects that serve the Komodo mission, this is what we call '[Shenlong's Den](#)'.

5% of funds from our notaries will be used to unleash "the Juan" to various conferences to network and help promote the Komodo ecosystem.

We will continually reinvest in server hardware and facilities to increase reliability and capacity. We see having dedicated self-owned sites as an essential step in building a flexible platform.

Ryan will be offering an open source solution for monitoring Notary Nodes using Nagios, a software product that he is highly proficient. This should help the community maintain their Notaries availability and reduce troubleshooting time.

Some of the KMD from the South American notary will go towards funding the construction of our 2nd physical Galt Mines location in Southern Chile. Travis will focus on this aspect, building out the physical foundation of the crypto-economy while documenting his work and providing a site design guide to the notary community. Developing a best-practices guide will strengthen the ecosystem as a whole.

Conferences Juan Attends

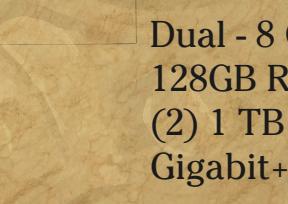

Anarchapulco, Acapulco

LaBitConf, Santiago

4thBlock, New York

Dctrl, Burning Man

and more...

Attend meetups in Toronto, Austin, Bogota, Medellin and any other cities Juan may go in 2018, as a Komodo Ambassador.

5% of our Komodo revenue will go to pay for Juan's Ambassadorial activities including plane fares, conference tickets, and associated expenses.

SHENLONG'S DEN

Up to 10,000 KMD to community services in 2018

thegaltmines.io/den

15% of KMD revenue per new notary, will go to community projects selected by The Galt Mines team.

If TheGaltMines are elected to the three regions below, Komodo will see nearly 10,000 KMD invested into community services and related projects during 2018.

Make your wish to Shenlong at: thegaltmines.io/den

If no one claims the treasure, it will grow.

If our dragons find your effort worthy, you might just get your wish.
